Grigoriev, V. Ya. and Koller, M. L.
SYNTHESIS OF VINYLENE [1961] 7p 12 refs
Order from OLS of JLA \$1.10 61 18084

Trans. of Central Chemical-Khimi (USSR) 1941, v. 11,
no. 9, p. 772-728.

DESCRIPTION: Phenol, System, Boron compounds,
Fluorinated, Ketone, imide.

A method of fluorination of eugenol was developed giving
up to 48% yields. The isomerization of the allyl ether of
guaiacol, the allyl radical was shown to be able to pass
into the β -position, even if a free α -position is avail-
able, when the ether is acted upon by boron fluoride or
its molecular compound with acetic acid. The synthesis
describes the isomerization of the allyl ether of guaiacol
under the action of either boron fluoride or the molecu-
lar compound of boron fluoride with acetic acid.
Guaiacol is a by-product of the rearrangement. In allyl
(Chemistry-Physical, TT, v. 6, no. 18) (over)
